

# Ninian Southern Platform - Fast Facts

Discovered	March 1974
Area	Northern North Sea Block 3/8a
Distance	457km (284miles) NNE of Aberdeen
First Oil	December 1978
Platform Type	Fixed Steel Jacket
Installed	June 1977
Facilities	Drilling, Production & Accomodation
Accommodation	200 Max, Average 160-180
Number of Modules	28
Total overall Height	312m (1023ft) seabed to top of the drilling derrick
Number of Wells	32 Production, 10 Water Injection
Jacket only Weight	17,727 tonnes (dry mass, excuding conductors)
Jacket Height	155 Metres seabed to Module Support Frame
Topsides Weight	27,522 tonnes
Water Depth	140m (458ft)
Fluids Exportation	To Sullom Voe via Ninian Central Platform
Drill Cuttings - Volume	39,200m <sup>3</sup> (Not shown)
Drill Cuttings - Footprint	40,190m <sup>2</sup> (Not shown)
Drill Cuttings - Height	17.5 Meters (Not shown)
Pile Guides - Height	30-40 Meters
Main Legs - Thickness	9.2 Metres
Previous owners	Chevron, Oryx, Kerr McGee
